Curtis Salley

Rahway, NJ | curtis.salley.cs@gmail.com | blkctrs-sys.github.io/curtis-salley

PROFESSIONAL SUMMARY

Inventory manager and operations lead with three years in a high-volume environment serving up to 400 guests a night. Own ordering, stock integrity, and vendor coordination across 10 suppliers; previously supervised a 20-person team during service. Promoted twice in under three years. Built a working inventory control app (receiving with price checks, blind cycle counts, variance reporting) to replace error-prone spreadsheets. Backed by four years of service desk support and training.

CORE SKILLS

Inventory Management • Purchasing & Ordering • Vendor & Supplier Coordination • Receiving & Stock Control • FIFO Rotation • Loss / Waste Reduction • Cycle Counts & Variance Tracking • Staffing & Scheduling • Team Leadership & Training • SOPs & Compliance • Quality Assurance • Ticketing Systems

PROFESSIONAL EXPERIENCE

High-volume steakhouse — Rahway, NJ

June 2023 – Present

Line Cook → Lead Line Cook → Inventory Manager

Inventory Manager

- Own daily inventory operations, proactively identifying and resolving stock deficiencies to prevent shortages and keep operations running without interruption
- Plan and place all supply orders, aligning purchasing with usage trends to control costs and maintain accurate stock levels across all categories
- Coordinate with 10 vendors and suppliers on delivery schedules, order accuracy, and pricing, resolving issues quickly to avoid service disruptions
- Maintain organized storage systems and enforce FIFO rotation and quality standards, reducing waste and product loss
- Support process accuracy and accountability by holding storage and receiving practices to consistent standards

Lead Line Cook

- Supervised a 20-person team during high-volume service (up to 400 guests per night), directing staffing, workflow, and station coverage in real time
- Verified prep and stock readiness before each shift and conducted quality checks to ensure consistency and compliance with safety standards
- Resolved in-the-moment operational and customer service issues to keep service moving smoothly
- Onboarded and trained new staff on procedures, safety standards, and performance expectations
- Held team members accountable to standard operating procedures and safety/sanitation compliance during every shift

Line Cook

- Executed multi-station production in a fast-paced, high-volume environment while maintaining sanitation and safety standards

Creative Testing Solutions

August 2018 – 2022

Service Desk Associate / Trainer

- Resolved high-volume customer and internal issues through the company's in-house ticketing system, prioritizing requests to meet response-time expectations
- Trained new employees on procedures and workflow systems, supporting consistent execution and faster ramp-up
- Maintained documentation and process consistency to support accurate reporting and accountability

PROJECT

Stockroom: inventory control web app

blkctrs-sys.github.io/stockroom

- Built a browser-based inventory system: purchase orders, receiving with automatic price and unit-of-measure checks, blind cycle counts with variance reasons, and monthly reports
- Designed the checks around real spreadsheet errors found in an audit of a month of ordering, including a pricing typo that overstated purchases by about $5,500
